

Packaging Products

Static Shielding Bags

Metal-In, Metal-Out

81705 Series Bags & Film

Qualified to MIL-PRF-81705E Type III, Class 2

Cushion Bags

Moisture Barrier Bags

Foil-High Barrier, Aluminum-Low Barrier

Other Packaging Products

Humidity Indicator Cards, Desiccant

Workstation Products

Wrist Straps

Single or Dual, 5', 6', 12' Fabric, Metal, Disposable

Foot Grounders

Standard, Cup, Heels, Disposable

Table and Floor Mats

Rubber (soldering), Vinyl Dual or Three Layer all widths, Up to 50'

Ionizers

Benchtop, Overhead, Air Gun

Instrumentation Products

Test Instruments

EM Eye - ESD Event Meter

Workstation Monitors

724, WS Aware

Equipment Monitors

Ground Master

ESD Vacuums

Electronic Service Vacuum

SMP Static Management Program

The Next Generation of ESD Process Control

SCS Static Management Program (SMP) continuously monitors your ESD process control system throughout all stages of manufacturing. SMP captures data from SCS workstation, equipment and ESD event continuous monitors and provides a real-time picture of critical manufacturing processes. All activity is stored into a database for on-going quality control purposes. SMP allows you to pinpoint areas of concern and prevent ESD events. Quantifiable data allows you to see trends, become more proactive and prove the efficiency of your ESD process control system.
